

RAPTOOL

Asset Tracking Inventory Management

- Keep track of your company's equipment and inventory:
IT-equipment, furniture, machinery, artwork, printers, emergency equipment
- Web interface and Mobile application with offline management
- Register service and maintenance: battery change, toners...

Raptool Asset Tracking

A complete asset solution

Raptool Asset Tracking has a web-interface where you can access your data from anywhere and any device. There is also a mobile application with barcode reading capability that you use to track and add assets. The mobile application can work offline for locations where you don't have wireless coverage.

With a barcode-based asset tracking system you:

- Reduce time spent tracking your assets
- Reduce errors and increase accuracy
- Maintain insurance records
- Track the value of your assets
- Meet auditing requirements.

Web-interface

Upload bulk data. Get an overview. Create reports.

Mobile interface

Count your inventory by scanning barcodes or RFID. The application guides the user through every process.

CDS

Flexible and easy to use

Upload a list of your existing assets through the web-interface or add new asset through the mobile barcode scanner.

Different types of assets can have different properties. Some examples:

- **Furniture:** Type (chair, table, lamp...), purchase year, size, shape, color...
- **Mobile phones:** Serial number, serial number, SIM-card, access-codes, IMIE number...
- **Building security equipment:** Fire extinguishers: filling date, next service date, replacement date...
- **Service:** Enter date for battery replacement, hours spent, service performed, material used...

Mark your items with a unique asset ID-number or use the products serial-number. Create your own number-series or use any type of
